ZEEP Forms Partnership with Exploration Technologies for Carbon Dioxide Sequestration, Monitoring and Consulting

Houston, Texas, USA – October 28, 2009 – ZEEP (Zero Emission Energy Plants Ltd.) is pleased to announce that it has signed a partnership agreement with Exploration Technologies, Inc. (ETI) to jointly work on sighting and strategy for CO₂ sequestration in areas where CO₂ pipelines for Enhanced Oil Recovery and/or Enhanced Coal Bed Methane are not readily available.

"Addressing the CO₂ sequestration issue is a key part of ZEEP's strategy..." said Bruce Bernard, President and CEO of ZEEP. "We are pleased to partner with ETI as they bring extensive global experience in the research, development, execution and interpretation of various geochemical techniques useful in environmental studies as we carefully prepare to deploy gasification projects in environmentally responsible ways."

As ZEEP develops gasification projects utilizing the Pratt & Whitney Rocketdyne gasification technology, ZEEP and ETI will form strategies and execution plans to deal with CO₂ sequestration and will approach these challenges using proven techniques, scientific methods and a track record of successful experience.

"One of the key issues that is often overlooked in geosequestration projects is the need for early monitoring to establish a base line before any project is executed. We are pleased to team with ZEEP as they site and develop gasification projects around the world," said Victor T. Jones, III, Ph.D., Principle Scientist and Founder of ETI.

Under the terms of the partnership agreement, ETI will provide consulting, project support and strategy development in ZEEP's focus areas of China, Australia, Canada and the United States.

About ZEEP

ZEEP is a privately held company, continued under the laws of Bermuda. ZEEP exists to create clean abundant energy from the most abundant natural energy resources of coal, petcoke,

waste and biomass. It is ZEEP's vision to create large energy centers for the production of a variety of clean, inexpensive fuels around the world. For additional information, please refer to www.zeep.com.

About Environmental Technologies, Inc.

Exploration Technologies, Inc. provides innovative geochemical services that are applicable to both the exploration & environmental industries. ETI's geochemical techniques are employed in the petroleum industry to reduce exploration risk and utilized in environmental assessments for accurate and cost-effective site characterizations. For additional information, please refer to www.eti-geochemistry.com.

Forward Looking Statement

Except for statements of historical fact, this news release contains certain "forward-looking statements" within the meaning of applicable securities laws. Forward-looking statements are frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward-looking statements include the intention of ZEEP and PWR to build the first commercial gasifier using PWR's compact gasifier technology; the ability of PWR's compact gasifier to out-perform other gasification technologies; and whether PWR's compact gasifier technology will be instrumental in the development of world-wide "clean coal" opportunities. Forward-looking statements are based on the opinions and estimates of management at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking statements including, without limitation, delays in obtaining any necessary governmental or regulatory approvals or permits; and capital and other costs varying materially from estimated costs. ZEEP undertakes no obligation to update forward-looking information if circumstances or management's estimates or opinions should change except as required by law. The reader is cautioned not to place undue reliance on forward-looking statements.
